What’s new from Portland Press in 2006?

Portland Press Ltd is the wholly owned subsidiary of the Biochemical Society. It is a not-for-profit Publisher of journals and books in the cellular and molecular life sciences.

New in 2006!

Biochemical Journal Archive

- a digital copy of every page in the print archive from 1906 to 2005 will be available from February 2006
Over 340,000 pages spanning 100 years of research

The Biochemical Society presented the newly digitized complete back archive (1906 to the present day) of the Biochemical Journal to the British Library on 16 February 2006. The presentation was the first of the special events planned in 2006 to celebrate the Biochemical Journal Centenary (see over for more details).

Libraries can choose to manage their own research preservation and electronic archive to maintain and ensure the future integrity of this data. Libraries will be able to locally load the complete back archive by purchasing the archive in a physical format.

Papers accepted for publication in the Biochemical Journal will be deposited automatically in PubMed Central (PMC), the U.S. National Institutes of Health (NIH) free digital archive of biomedical and life sciences journal literature, 6 months after the publication date of the issue.

Digital archive purchase (1906-2005) – £5000/US$9450. Annual updates will be available.

Cell Signalling Biology

- an outstanding new online reference work!

This major new contribution to the field of cell signalling by one of the world's leading experts, Professor Sir Michael J Berridge (Cambridge), will provide researchers, teachers and students alike with an essential online resource to describe the biology of cell signalling. The emerging information on cell signalling pathways is integrated and presented within the context of specific cell types and processes.

Cell Signalling Biology will be available on anytime start 12-month subscription with annual updates. It will utilize the 3-frame Enhanced Electronic Serials Interface (EESI-View) allowing readers to view text and figures on screen at the same time as well as having extensive intra- and inter-linking between sections.

- Available on subscription from July 2006
- Institutional price – £150.00 (12 months subscription)
- Institutional subscriptions will allow site wide access.
- Multi-site licenses are also available

Biochemical Journal Centenary – 1906-2006

The prestigious *Biochemical Journal* is celebrating 100 years of scientific excellence in 2006 with three major events during the year when bioscientists from around the world will gather in the UK to mark the Centenary.

The complete *Biochemical Journal* online archive (see over page) was launched in February 2006. The Centenary celebrations continued at the 2006 Biochemical Society Annual Symposium at the University of Birmingham. The highlight of the Centenary celebrations will be at BioScience2006 to be held at the Scottish Exhibition and Conference Centre, Glasgow, in July 2006 when 1,500 delegates are expected to attend the BJ Centenary Symposium – Literature, Legacy, Life ...

Biochemistry for the 21st Century.

See www.BJCentenary.com for details.

Also in 2006!

**Biology of the Cell**

*Biology of the Cell* will be available in EESI-View format in 2006 in addition to pdf and HTML formats. The enhanced EESI-View format is only available to current subscribers.

**Biotechnology and Applied Biochemistry**

Increased frequency in 2006 from 6 to 9 issues and more pages.

**Latest mailing dates**

For those libraries still subscribing to print copies of journals, you can find the latest mailing dates by following the “Librarian” link on the Portland Press website where you can also renew your subscriptions online or register your IP address.
